Studio

# Looking for specific mobile applications for data collection?

DCAPP might just be the right choice for you. This ready-to-use app changes the way you capture, transfer, and export data. No need to have mobile computing or coding knowledge!

Effortlessly create personalized data collection apps by configuring up to ten fields through a user-friendly process.

Simplify data export via FTP, MIS Communicator, Email, Dropbox, and local files. Validate your collected data by easily importing files into your app.

Overcome language barriers with multi-language support including English, French, German, Hungarian, Ukrainian, Italian, Portuguese, Romanian, and Spanish.

Choose from a selection of six pre-established templates, including Basic Inventory, Shelf Inventory, Assets Shelf Replenishment, Order Entry, and Barcode Compare. DCAPP eliminates the need to start the whole data collection process from scratch.

*DCAPP is pre-licensed for MT37 Baiji.*

**Basic inventory**  
Item & quantity
